Re: NEC – Native Education College Summer Mathematics Program  
Located at 285 East 5<sup>th</sup> Avenue Vancouver, BC

I would like to take this opportunity to thank the NEC for supporting the summer math program and promoting a foundations of strength for each student.

My son entered the program July 2014 and July 2015 and has excelled in his knowledge of math so he may pursue academic excellence and a career path. Mitchell Sheers is enrolled to attend the July 2016 math program again.

My son comes away from the program with a stronger confidence in his knowledge not only in mathematics as well as youth empowerment and Elders teachings.

From a student that was a failing grade coming into the program at the end of grade 8 his first program in July 2014 he went from "D" to 90%, he continued to excel the following year as well.

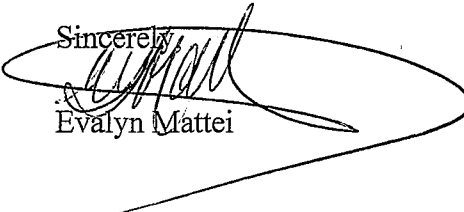

We find the environment warm and safe, giving the students a sense of belonging and that someone cares about what they are doing with the ongoing support of the students.

I personally believe this program should be shared within the public school system to help all students have a better grasp of mathematics.

Our family appreciates all that the NEC Program has offered to our son..

Thank you and we look forward to continuing the program for the next couple years until graduation.

Sincerely,

  
Evalyn Mattei

Rahael

Len and I would like to personally thank you for all your support over the past 5 years with the Eagles of Tomorrow program at the NEC.

Your presentation gift is truly appreciated and going in the bank towards his next semester at BCIT.

Your program has given Mitchell the tools to be successful and he is now currently enrolled at BCIT (ACEiT program for carpentry)

We are very proud of our son in all his accomplishments.

Love

Evalyn and Len
